

To the New York State Congressional Delegation:

Our coalition of New York State consumers, health care and human service workers, and providers and insurers urge you to strongly oppose the new Cassidy-Graham bill to repeal the Affordable Care Act (ACA), which could be voted on in the Senate in the coming days. If the bill clears the Senate, it would be sent to the House for your consideration. Your opposition to the bill is critical, as its implementation would catastrophically cut Federal funding to New York's health care system and severely compromise your constituents' access to health care coverage and services.

The Cassidy-Graham bill would eliminate the ACA's tax credits and Medicaid expansion, and replace them with profoundly inadequate per capita block grants to states. According to the Center on Budget and Policy Priorities, the block grant policy and the Medicaid per capita cap would cut Federal spending to New York State by \$18.9 billion in 2026.

As the bill's authors have explained, their plan is specially designed to take Federal funding from New York State and redistribute it to states that chose not to expand their Medicaid programs. Further, the bill's waiver provisions would also allow states to upend protections for individuals with pre-existing conditions and eliminate requirements that plans provide comprehensive coverage.

We urge the Delegation to reject the Cassidy-Graham bill. It's time to work together in a bipartisan way to improve New Yorkers' coverage and access to quality health care.
