

CP of NYS Annual Award Recipient

AL FELMET ACHIEVEMENT AWARD

Jacob Fink – Upstate Cerebral Palsy

Jacob Fink does not let any challenge he faces limit his goals and expectations. He is hard-working, dedicated and an inspiration to others. He has been employed as a computer technician with Upstate Cerebral Palsy for less than three years, but has continued to add responsibilities and gain increasing confidence and respect from his colleagues and supervisors.

As Network Administrator he currently oversees servers, network infrastructure and telecommunications for Upstate CP. For most of the past year, Jacob has also been spearheading a large telecommunications conversion project. In that role he is responsible for implementing infrastructure changes, communicating with staff about those changes, training employees, installing new equipment and providing needed ongoing support.

His positive attitude is infectious and his colleagues know that he is committed to successfully completing any tasks he undertakes. Mr. Fink continually challenges himself to do better and is equally comfortable working independently or as a member of a team. He is also a very caring individual and will often go out of his way to assist when he senses someone needs a hand.
